Biography

Dr. Hasan TATLI is -meteorological engineer- a full Professor in the Department of Geography at Canakkale Onsekiz Mart University. He focuses on climate, climate change, and meteorology. His study focuses on developing small-scale regional climate models (downscaling) and evaluating the relevance of variability to predict climate change effects. His current research interests include meteorological-climatological disasters and climate change implications, multidimensional drought sensitivity, developing Copula-based multidimensional drought indicators, and forest fire monitoring and forecasting. He also does theoretical research in the areas of chaos theory and uncertainty.

Dr. Hasan TATLI develops the source codes for the computer programs used in all of his investigations; he also has professional experience using the FTN 90-95-2000, MATLAB, Python, R-language, MS-Office, Statistica and SPSS, Golden Software tools.
